## Wireless Wave Control System

'WORLD'S SAFEST CONTROL SYSTEM FOR PUMP OPERATOR AND JET OPERATOR'

The Wireless Wave Control System integrates wireless technology with a brand new ergonomic design and safety features that will benefit both contractor, operator and client alike. A revolution for the industry.

Ergonomic Wire Wave Gun

### Wireless control up to 500 meters

The essence of the Wireless Wave Control System (WWCS) is crystal clear: jet operators no longer need to drag a signal cable in order to control their high pressure water unit. Instead: a WWCS Reception Module is installed on the high pressure unit. It receives wireless operating signals from the jetting operators' gun or foot gun, or the machine operators' Master Control up to a distance of 500 meters. The system complies with all required industry and safety directives, such as ATEX/EMC.

- *Amazing ergonomic gun and impressive hose control;*
- *Simple, safe and reliable operation;*
- *Trouble-free track record since its introduction;*
- *Increasing number of HP units equipped with WWCS;*

Wireless Wave Master Control

Wireless Wave Foot Gun

## WIRELESS

- Safest wireless control system in the world;
- Wireless connection replaces signal cables;
- Wireless Master Control enhances safety;
- New safety and manoeuvrability features;
- All accessories ATEX zone 2 approved.

### Users' comments:

*"Fits comfortably in your hand and the rotating handle is great!"*

*"Much less vibration and we finally got rid of those cables!"*

*"Finally a gun specially designed for users!"*

### Safe time, energy and money

The wireless way of working is not only easier and lighter for the operators, it also prevents costly 'down time' due to damaged signal cables or the necessity to install long lengths of extra signal cables.

### Safest spray gun in the world

On top, the light weight Wireless Wave Gun is easy to handle and offers new manoeuvrability options, due to the handle that is moveable sideways, including two triggers (vertical and horizontal). New safety features include a trigger lock and an anti-vibration design. It makes the WWCS gun the safest and easiest gun available in the market.

- Compliant with all industry standards and safety directives;
- Light weight wireless gun improves productivity;
- Constant bi-directional communication;
- Only system for safe operation Open Hose Control;
- Compatible with approved high pressure jetting systems.
